

I urge you to reject the NAB's petition 04-160. We as consumer's should have the RIGHT to choose from a variety of products and serivices, no matter what they are! XM Satellite Radio provides quality and a wonderful variety that isn't available anywhere else. Those of us that appreciate this service, pay for it and thus should be able to continue to do so and receive the same quality programming as before!! After all..... this IS America!
